

EPIS AI Chatbot- Sample FAQ

1. How to login to EPIS?

To log in to the EPIS system, follow these steps:

Step 1: Open any EPIS link

You can access EPIS using any of the following links:

- i. <https://jdwnrh.epis.gov.bt/>
- ii. <https://crrh.epis.gov.bt/>
- iii. <https://errh.epis.gov.bt/>
- iv. <https://epis.gov.bt/>

These links will take you to the EPIS login page.

Step 2: Enter Login Details

- i. Enter your EID (Employee ID)
- ii. Enter your Password

Step 3: Login

- i. Click on the Login button
- ii. You will be redirected to your dashboard successful

MODULE: Dialysis

1. How to access Dialysis Dashboard?

- i. Login to EPIS
- ii. Click the menu (≡ icon)
- iii. Search for Dialysis Dashboard
OR
- iv. Go to Dialysis -Transaction -Dialysis Dashboard

2. How to search a patient in Dialysis?

You can search using:

- i. UHID
- ii. Order Number
- iii. Patient Name
- iv. CID

Enter details in the search bar and select the patient.

3. How to filter dialysis records?

- i. Select From Date and To Date
- ii. Click Show

You can also filter by:

- i. Department
- ii. Session Status

4. How to set default filters?

- i. Select filter options
- ii. Click Set as Default
- iii. Click OK

5. How to schedule a dialysis session?

- i. Click Schedule
- ii. Select:
 - Rendering Department (e.g., Dialysis Unit)
 - Session Time (Morning/Evening)
- iii. Add remarks(optional)
- iv. Click Save

6. How to reschedule a dialysis session?

- i. Click on Scheduled session link
- ii. Change:
 - Session Date
 - Session Time
- iii. Click Save

7. How to view doctor remarks and order request?

- i. Check Remarks column for doctor notes
- ii. Click Eye icon to view order form
- iii. Click Print to print

8. How to generate visit for OPD patient?

1. Click Arrow icon after scheduling
2. Fill required details
3. Select:
 - Day Care
 - Walk-in or Bed allocation
4. Click Save

9. How to check visit number?

- i. After saving, click Show
- ii. Visit number will appear in Visit Number column

10. How to fill Dialysis Assessment?

- i. Click Fill Report icon
- ii. Open assessment tables
- iii. Fill details step by step
- iv. Click Save & Next

11. How to view patient details?

- i. Click (i) icon – Patient demographics
- ii. Click Previous Visit Details – Medical History

12. How to complete dialysis session?

- i. Enter nurse name
- ii. Tick checkbox
- iii. Click Save
- iv. Click Back to List

13. Why can't I see dialysis data?

- i. Check filters (date, department, status)
- ii. Click Show
- iii. Make sure correct patient is selected

MODULE: Pharmacy

1. How to create and manage route type?

- i. Navigate to Route Type Master Page
- ii. Click Add New
- iii. Enter the Route Type name
- iv. Click save

To update Route Type:

- i. Select the existing entry from the list
- ii. Make necessary changes
- iii. Click Save

To Delete Route Type:

- i. Click Delete
- ii. Enter the reason for deletion
- iii. Click Yes, delete it

2. How to Create Route of Administration?

Route of Administration specifies the exact method of drug delivery

Steps:

- i. Click Add New in RoA section
- ii. Select the Route Type
- iii. Enter the Route Administration
- iv. Check Calculate on Prescribing (Optional)
- v. Click Save

Selecting Calculate on Prescribing helps auto calculate medicine quantity during prescription.

3. How to Create a New Drug in Item Catalogue?

Item Catalogue stores all medicine details used in the system.

Steps:

- i. Click Add New
- ii. Select Item Category (ATC Drugs)
- iii. Enter:
 - Drug Name
 - Drug Code (ATC code)
 - Drug Strength
 - Drug Unit
- iv. Select:
 - Route Type
 - Route of Administration
- v. Select Unit of Measurement (UoM)
- vi. Enter Conversion Factor
- vii. Click Save

UoM is used for stock management, not for patient dosage

Substitute drugs can be added for alternative use.

4. How to Update or Delete an Item in Catalogue?

- i. To Update:
 - Select the item from the list
 - Modify the required fields
 - Click Save
- ii. To Block Item:
 - Check the Block option
 - Click Save
- iii. To Delete:
 - Click Delete
 - Enter reason
 - Confirm deletion

5. What is Pending Dispense List and How to Use It?

Pending Dispense list shows medicines that are yet to be dispensed.

Steps to View:

- i. Navigate to Pending Dispense List
- ii. Apply filters:
 - Date range
 - Case Type (New / Follow-up)
 - Status (Pending / Partially Dispensed)
 - Department
 - OPD Type
- iii. Click Show

6. How to Dispense Medicines?

- i. Select patient from Pending Dispense List
- ii. Dispense screen will open
- iii. Select
 - Facility Department
 - Department Location
- iv. Click Prescription to view details
- v. Enter Dispense Quantity
- vi. Click Save

After saving Dispensed medicines will move to the Dispensed Medicine List

7. How to View Dispensed Medicines?

- i. Navigate to Dispensed Medicine List
- ii. Select date range
- iii. Click Show
- iv. Click any entry to view details

8. What is Named Patient Drug? (NPD)

Named Patient Drug refers to medicines that are not available in the standard Essential Drug List (EDL) and are prescribed for specific patients.

9. How to Create Named Patient Requisition?

- i. Click Named Patient
- ii. Search and select patient
- iii. Add drug details:
 - Frequency
 - Duration
 - Quantity

- Instructions
- iv. Click Save

10. How to Approve or Reject Named Patient Drug?

- i. Open the request
- ii. Review:
 - Patient details
 - Documents
 - Prescription
- iii. Enter comments
- iv. Select:
 - Yes – Approve
 - No - Reject
- v. Click Save

11. What is HTC Approval?

Hospital Therapeutic Committee (HTC) reviews and provides final approval for Named Patient Drug requests.

Steps:

- vi. Open request
- vii. Enter recommendation
- viii. Select approval/ rejection
- ix. Click Save

12. How to Create ADR (Adverse Drug Reaction) Request?

ADR is used to report drug- related reactions.

Steps:

- i. Click Add New ADR
- ii. Search and select patient
- iii. Enter:
 - Drug details
 - Reaction description
 - Date and time
 - Outcome

- iv. Add:
 - Allergies
 - Other medications
- v. Enter reporter details
- vi. Click Save or Save as Draft

13. How to Add Stock (Stock Inward)?

Steps:

- i. Go to search menu and search stock inward
- ii. Click Add New
- iii. Select:
 - Department
 - Department Location
- iv. Enter:
 - Purchase Order number
 - Remarks (Optional)
 - Search item – Use this option to search for items that need to be restocked.
- v. Add item details:
 - Batch Number
 - MFG Date
 - Expiry Date
 - Quantity
 - Rate – Not required
- vi. Click Save

A Stock Inward Number will be generated after saving.

14. Why is my medicine not showing in the system?

The possible reasons might be:

- i. Incorrect filters applied
- ii. Drug not added in Item Catalogue
- iii. Prescription not generated
- iv. Stock not available

15. Why am I unable to dispense medicine?

The reasons are:

- i. No stock available
- ii. Incorrect department or location selected
- iii. Prescription not approved
- iv. System role restriction

MODULE: Grievance

1. How to Access the Grievance Module in EPIS?

The Grievance module allows users to register and manage complaints raised by staff or the public.

Steps:

- i. Login in the EPIS system.
- ii. On the homepage, click the Grievance icon or open the burger menu on the left side.
- iii. Click the Grievance menu.
- iv. Select the Transaction menu.

So, this will open the options related to grievance registration and management.

2. How to register a new grievance complaint?

Grievances can be registered by staff members or the public through the grievance registration form.

Steps:

- i. Navigate to Grievance – Transaction – Grievance Registration
- ii. Select the Complaint Raised By option from the dropdown list.
- iii. Choose either:
 - Staff
 - Public
- iv. Enter all the required fields in the grievance registration form.
- v. Upload supporting documents if available.
- vi. Click Save to submit the complaint.

Once saved, the system will generate a unique Complaint Number, which can be used for tracking the grievance.

The complaint number is important for future reference and tracking

Only mandatory fields must be filled before saving.

3. How to Upload Supporting Documents in Grievance Registration?

Users can attach supporting documents to provide evidence related to the complaint.

Steps:

- i. Click the Choose File button
- ii. Select the required file from your computer.
- iii. Click Add to upload document
- iv. Click View Documents to verify the uploaded files.

Supporting documents may include:

- Photos
- PDF files
- Other relevant evidence.

5. How to View Registered Grievances?

All registered complaints can be viewed from the Grievance Dashboard.

Steps:

- i. Navigate to the Grievance Dashboard.
- ii. Use the filter options or click the Show button.
- iii. The system will display the list of grievances based on the selected status.

Users can track the status of grievances directly from the dashboard.

5. How to View Details of a Grievance Complaint?

Users can open any complaint to view its full details.

Steps:

- i. Go to the grievance dashboard.
- ii. Locate the complaint in the list.
- iii. Click the View button next to the complaint.

The system will open the Grievance Action Index page, which displays all actions taken on the complaint.

6. How to set the priority of a grievance?

Users can assign a priority level to a grievance based on the seriousness of the issue.

Steps:

- i. Open the complaint from the grievance dashboard.
- ii. Select the grievance priority option.
- iii. Enter remarks in the remarks field.
- iv. Click the required action button.
- v. Click Save

The complaint status will update based on the selected action.

7. How to Provide Feedback on a Grievance?

After a complaint has been processed, feedback can be provided by the concerned user.

Steps:

- i. Navigate to the Feedback page.
- ii. Click the Add new button.
- iii. Select the Complaint Number.
- iv. Click view to see the complaint action log.
- v. Enter feedback in the feedback description field.
- vi. Select the Feedback Status.
- vii. Click Save

A confirmation message will appear once the feedback is saved successfully.

8. How to Generate a Grievance Summary Report?

Users can generate reports to analyze grievance records within a selected time period.

Steps:

- i. Navigate to the report section.
- ii. Click grievance summary report.
- iii. Select the From Date and To Date.
- iv. Click Show Report to view the data.

9. How to reopen a grievance complaint?

If the complainant is not satisfied with the resolution, the complaint can be reopened.

Steps:

- i. Navigate to the Grievance Dashboard.
- ii. Click the Feedback tab.
- iii. Locate the complaint.
- iv. Click View.
- v. Click the Reopen Button.

10. Why is y grievance not showing in the dashboard?

The possible reasons should be:

- Incorrect filter settings
- Complaint not saved successfully

- User role restrictions

User should verify the filters and ensure the grievance registration process was completed correctly.

MODULE: AUDIOLOGY

1. How to Access the Audiology Module in EPIS?

The Audiology module allows healthcare professionals to conduct and record audiometry test for patient in the EPIS system.

Steps:

- i. Log in to the EPIS system using your Username (EID) and Password.
- ii. After logging in, navigate to the Audiology service section from the system menu.
- iii. Select the patient from the available list or search for the patient record.
- iv. Click the Show button to display the available audiology services for the patient.

2. How to search for an Audiology service in the system?

Users can search for a specific audiology test or service before recording the test results.

Steps:

- i. Open the Audiology service page.
- ii. Click the Service selection dropdown.
- iii. Select the required audiology service from the list.
- iv. Alternatively, type the service name (for example, Pure Tone Audiometry) in the search field.
- v. Click the Show button to display the selected service.

3. How to open the Audiology test report form?

Once the required service is selected, the user can open the report form to enter test results.

Steps:

- i. Select the required audiology service.
- ii. Click the Fill Report icon.
- iii. The system will open the service report page where test results can be entered.

NOTE: only authorized users such as audiologist or technicians can fill the report.

4. How to enter Audiology test results?

Audiology test results must be recorded in the system after the test is conducted.

Steps:

- i. Navigate to the service report page.
- ii. Enter the service report details in the provided field.
- iii. Click Audiology Test to open the charting section.
- iv. Enter the required test data for the patient.

5. How to enter charting data for an Audiometry Test?

Charting data represents the hearing levels measured during the audiometry test.

Steps:

- i. Open the Audiology Test charting page.
- ii. Enter the relevant test values based on the audiometry test performed.
- iii. Fill in the data points for the different hearing frequencies tested.

The system will automatically generate a graph based on the entered coordinates.

6. How to save the Audiology test report?

After entering all the test results, the report must be saved in the system.

Steps:

- i. Review the entered test details
- ii. Click the Save button to store the test data
- iii. Click Save again to confirm and store the service report.

Once saved, the audiology test report will be recorded in the patient's medical record.

7. How to print the Audiology test report?

Users may print the audiology report for patient records or documentation purposes.

Steps:

- i. After saving the report, click the Print button.
- ii. Review the report preview.
- iii. Click Print to generate a printed copy of the report.

7. How to reopen the charting page for a patient?

If corrections are required, users can reopen the charting page.

Steps:

- i. Locate the patient record from the service list.
- ii. Click on the displayed patient record.
- iii. The system will navigate to the charting page where the data can be edited.

8. Why is the Audiogram graph not appearing?

The reasons might be:

- Charting data has been entered.
- Incorrect coordinates were entered.
- The test results were not saved.
- System or network issue.

9. Why am I unable to save the Audiology report?

The reasons might be:

- Mandatory fields are not filled
- Test data is incomplete.
- User role does not have permission to save reports.
- System connectivity problem.

Users should ensure all required fields are completed before saving.

MODULE: PHYSIOTHERAPY

1. How to advise Physiotherapy service for a patient?

Doctors can recommend physiotherapy services for a patient through the EPIS system.

Steps:

- i. Login to the EPIS system using your EID and Password.
- ii. Navigate to the Doctor Dashboard.
- iii. Select the patient from the patient list.
- iv. Scroll down to the service section.
- v. Search for the physiotherapy service by typing service name.
- vi. Select the required service.
- vii. Enter the number of sessions required.
- viii. Click Save EMR to confirm the service advice.

Once the service is saved, the physiotherapy department will be able to view and schedule the sessions.

2. What is the Physiotherapy Dashboard in EPIS?

The Physiotherapy dashboard is used to manage physiotherapy services for patients.

It provides information such as:

- Patient details

- Ordered physiotherapy services
- Scheduled sessions
- Session status
- Available actions

The dashboard helps physiotherapists monitor and manage patient sessions efficiently.

3. How to schedule physiotherapy service sessions?

Physiotherapy sessions must be scheduled before treatment begins

Steps:

- Navigate to the Physiotherapy Dashboard.
- Search and select the patient.
- Click the schedule button
- Select the session date and session time.
- Click Save to schedule the session

The schedule session will appear in the dashboard grid.

4. How to reschedule or cancel a physiotherapy session?

If a patient cannot attend a scheduled session, the appointment can be modified or cancelled.

Steps:

- Navigate to the Physiotherapy Dashboard.
- Search and select the patient.
- Click the Reschedule button
- Select the new date and time
- Click Save.

To cancel a session:

- Click cancel schedule
- To cancel all sessions, select the cancel all schedule session checkbox.
- Click Save.

The session status will update accordingly.

5. How to fill consent for physiotherapy services?

Patient consent is required before starting physiotherapy treatment.

Steps:

- Navigate to the Physiotherapy Dashboard.
- Search and select the patient.
- Click the consent icon
- Select the Witness Accepts Consent checkbox.

- v. Enter the Witness Name and Relation
- vi. Upload the consent document if available.
- vii. Click save to record the consent.

6. How to fill a physiotherapy session report?

Physiotherapists must record treatment observations and results after each session.

Steps:

- i. Navigate to the Physiotherapy Dashboard.
- ii. Search and select the patient.
- iii. Click the Fill Report button.
- iv. Select a predefined template if required.
- v. Enter the treatment observations or report details.
- vi. Upload any images or scanned documents if necessary.
- vii. Click Save to store the report.

7. How to dispatch assistive devices to a patient?

Assistive devices such as walkers or supports can be issued to patients through the system.

Steps:

- i. Navigate to the Orders section.
- ii. Click the Assistive Devices tab.
- iii. Click the Outward button.
- iv. Enter the required details such as:
 - Department
 - Location
 - Device name
 - Batch number
 - Quantity
- v. Click Add to add the device to the grid.
- vi. Enter patient receiver details:
 - Receiver name
 - Relationship
 - Contact number
 - Address
- vii. Enter the deposit amount if required.
- viii. Click Save to dispatch the device.

9. How to collect deposit for assistive devices?

When the patient returns the device, it must be recorded in the system.

Steps:

- i. Navigate to Orders – Assistive Devices.
- ii. Click the inward button.
- iii. Enter the following details:
 - Return quantity
 - Returned by
 - Contact number
 - Return date and time
- iv. Select the Received checkbox.
- v. Click Save to complete the inward process

10. How to refund the deposit amount for assistive devices?

After the device is returned, the deposit amount can be refunded.

Steps:

- i. Navigate to the Refund Approval Page.
- ii. Approve the refund request.
- iii. Navigate to the Refund page.
- iv. Click Add New
- v. Search and select the patient.
- vi. Click Assistive Devices to view device details.
- vii. Enter the refund amount.
- viii. Select the reason for refund.
- ix. Click Save to complete the refund process.

11. How to discontinue physiotherapy services?

Physiotherapy services can be discontinued if the treatment is completed or no longer required.

Steps:

- i. Login to the EPIS system
- ii. Navigate to the Doctor Dashboard.
- iii. Select the patient.
- iv. Scroll to the services section.
- v. Click Ongoing services.
- vi. Select the physiotherapy service.
- vii. Click the discontinue button.

12. Why is the Physiotherapy session not showing on the Dashboard?

The reasons are:

- The physiotherapy service was not saved in EMR.
- Incorrect filter settings were applied.
- Session schedule was not created.

Users should verify filters and ensure the service was correctly advised.

13. Why am I unable to schedule a Physiotherapy session?

Possible reasons:

- The physiotherapy service has not been advised by the doctor.
- The patient record is not selected.
- User role does not have scheduling permission.

MODULE:

DOCTOR DESK

GENERAL

Q1. How do I log into Doctor Desk?

Ans:

- Goto epis portal
- Enter Employee ID as user name
- Enter Password
- Click login

Q2. Why can't I access doctor desk after login?

Ans:

You may not have the required role assigned:

- Doctor role not assigned
- Department not mapped

Q3. How do I filter patients in doctor dashboard?

Ans:

- Use date filter to view patients
- User Case Type (New Case/Old Case)
- Use status filter (Checking/Waiting...)
- Click show

Q4. Why can't I access ER IP and ER OP?

Ans:

- Doctor role not assigned
- Not mapped to the required department

OPD

Q1. Why are no OPD patients visible in my dashboard?

Ans:

- Wrong date filter

- Doctor not mapped to OPD
- Incorrect role assigned

Q2. How do I view patient record/demography (EMR)?

Ans:

To view record, follow these steps:

- Goto OPD Doctor Dashboard
- Use filters to search patient
- Select the patient

Q3. How to enter patient vitals and view vitals trend?

Ans:

- Open patient EMR page, enter values in vital section and save.
- Click '+' Icon to view graphical vital trends.

Q4. How to add complaints?

Ans:

Add the complaints in the complaints field section/ search complaints then select from the list and add details.

IPD

Q1. Why is IPD Doctor Dashboard blank?

Ans:

- Doctor role not assigned (OPD/IPD)
- User not mapped as doctor in system
- Department not mapped

Q2. Why is ward not visible in IPD?

Ans:

Doctor is not mapped to department or doctor setup is incomplete.

Q3. How to change admitting doctor to another doctor?

Ans:

To change admitting doctor, follow these steps:

- Goto department wise patient transfer
- Search the patient using CID/UHID/Bed no.
- Click on the patient
- Select the doctor and facility department
- Save

Appointment

Q1. How do I check Doctor availability?

Ans:

Click Doctor Availability to view schedule.

Q2. Why are appointments not visible?

Ans:

No appointments booked

Wrong date selected

Schedule not configured

Register Patient

Q1. Why don't I have access to register patient?

Ans:

You may not have required role assigned.

Q2. Why is patient not appearing after registration?

Ans:

- Registration not completed
- Wrong department selected
- Registration not saved

REFERRED PATIENTS

Q1. How do I refer a patient?

Ans:

- Open Referral section
- Enter required details:
 - Referral type
 - Facility
 - Doctor
 - Reason
- Click Add → Save

EMR FUNCTIONS

Q1. How to add diagnosis?

Ans:

Search → Select → Save

Q2. What if diagnosis is not available?

Ans:

Use NAD/Others option

Q3. How to order lab/radiology tests?

Ans:

- Search test
- Select
- Save

Q4. Can I schedule orders for later?

Ans: Yes, use Order After Days

Q5. How to prescribe medicine?

Ans:

- Search drug
- Select drug
- Enter details and save

IPD

Q1: What can I do in the IPD module?

Ans: You can manage:

- Admission
- Bed allocation
- Bed transfer
- Nursing care
- Discharge process

Admission

From OPD

Q2: How do I admit a patient from OPD referral?

Ans:

1. Go to Reception module
2. Open Referred Patient List
3. Click Go to Registration
4. Select department, doctor, ward, room, and bed
5. Click Save

From Emergency

Q3: How do I admit a patient from Emergency?

Ans:

1. Go to Referred Patient List
2. Click Go to Registration
3. Select department and doctor
4. Check Admit to IPD
5. Click Save
6. Allocate bed from Pending Bed Allocation

Direct Admission

Q4: How do I directly admit a patient without referral?

Ans:

1. Open Admission page
2. Search patient using CID/UHID
3. Select department, doctor, ward, and bed
4. Save the admission

Nursing Dashboard

Q5: How do I access the Nursing Dashboard?

Ans:

1. Go to IPD module
2. Click on Nursing Dashboard

Q6: Why can't I see a patient in the nursing dashboard?

Ans: The patient will not appear until a bed is allocated.

Q7: How do I assign a bed to a patient?

Ans:

1. Go to Nursing Dashboard
2. Click Pending Allocation
3. Assign a bed
4. Patient will appear on dashboard

Treatment & Services

Q8: How do I view or complete ordered services?

Ans:

- Go to Nursing Dashboard
- Search patient and click on it

- Click on services
- Mark services as GIVEN after completion
- Enter given time and date

Q9: Can nurses order services?

Ans: Yes, nurses can order services on behalf of doctors based on verbal instructions.

Q10: How do I record Treatments to be given (Prescription)?

Ans:

- Go to Prescription section
- Mark medicine as GIVEN
- Enter date and time

Q11: How do I order investigations?

Ans:

1. Go to Investigation tab
2. Click Order Investigation
3. Select required tests (lab/radiology)
4. Confirm order

Birth Registration

Q12: How do I register a newborn baby?

Ans:

1. Go to Nursing Dashboard
2. Search using MCH no.
3. Click 3-dot menu
4. Select Birth Registration
5. Enter mother and baby details

6. Click Final Save

Q13: When can birth registration be done?

Ans: Only when the mother has a valid MCH number.

Bed Transfer

Q14: How do I transfer a patient to another bed?

Ans:

1. Search patient from Nursing Dashboard
2. Click 3-dot menu → Bed Transfer
3. Select new ward/bed
4. Click Save

Q15: Can I change only the doctor without changing department?

Ans: Yes, you can keep the same department and change only the doctor.

Department Transfer

Q16: How do I transfer a patient to another department?

A:

1. Open Department Transfer page
2. Search patient
3. Select new department and doctor
4. Save changes

Discharge Process (Nurse)

Q17: How do I discharge a patient as a nurse?

Ans:

1. Open Nursing Dashboard
2. Select patient

3. Click Discharge Advice
4. Fill required details
5. Click Final Save

Q18: When can a nurse deallocate bed?

Ans:

- For dialysis/small facilities: nurse can do it
- Otherwise: only after doctor completes discharge summary

Q19: What if doctor has not completed discharge summary?

Ans:

- Nurse can only deallocate bed manually
- Cannot complete full discharge

Discharge Process (Doctor)

Q20: How does a doctor discharge a patient?

Ans:

1. Go to Doctor Desk → IPD
2. Open patient EMR
3. Click Discharge Advice
4. Fill details
5. Mark discharged

Q21: How can I search a patient in IPD?

Ans: You can search using:

- UHID
- CID
- Bed Number

Q22: What is “Planned Discharge”?

Ans: It is a feature to mark a patient as likely to be discharged soon.

Emergency

Q1: How do I log in to the Emergency (EMS) system?

Ans:

- Open the browser and go to epis portal
- Enter username
- Click Login

Q2: Why can't I access ER IP and ER OP?

Ans: You may not have been mapped to the required role.

Q3: How do I register a patient in Pre-Hospital Care?

Ans:

1. Click Register
2. Enter CID number
3. Click Get
4. Fill in patient details
5. Continue with incident and medical details

Q4: What details are required under Incident Information?

Ans:

- Dzongkhag
- Gewog
- Transfer location
- Priority level
- Reason for dispatch
- Incident location

Q5: What times need to be recorded?

Ans:

- Assign Time
- Departure Time
- Scene Arrival Time
- Departure Scene Time
- Hospital Arrival Time
- Patient Handover Time

Q6: How do I write case summary?

Ans: Enter a brief summary of the patient condition and situation in the Case Summary field.

Q7: What should be filled under Assessment and Intervention?

Ans:

- Physical examination details
- Medical direction
- Treatment/interventions provided

Q8: How do I access Emergency Registration?

Ans:

1. Go to menu
2. Click Emergency Registration

Q9: How do I find a patient registered from Pre-Hospital Care?

Ans: The patient will automatically appear in the Emergency Registration list

Q10: How do I allocate a bed to a patient?

Ans:

1. Click Allocate Bed

2. Select Department
3. Select Ward
4. Select Room
5. Select Bed
6. Click Save

Q11: Why can't I see some beds?

Ans: Only available or empty beds are shown in the system

Blood Bank

Q1: How do I generate blood bag barcode labels?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Donor Management → Bulk Barcode Generation
3. Select donor type bag such as mobility, replacement, directed etc.
4. Enter the number of labels to be printed
5. Click Generate barcode button

Q2: How do I print blood bag labels?

Ans:

1. Select the date on which the component blood bag is generated
2. Choose the component type
3. Enter number of copies and select printer name
4. Click Print Barcode button

Q3: How do I register a donor?

Ans:

1. Click on main menu icon

2. Go to Blood Bank → Donor Management → Donor Registration
3. Search donor by UHID or CID
4. Enter donor demographic details, address, and blood group
5. Click Save button

Q4: What happens after donor registration?

Ans:

1. System generates a unique donor code
2. The donor code is permanent and can be used for multiple donations

Q5: How do I perform donor checkup?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Donor Management → Donor Checkup
3. Search donor by donor code or CID
4. Fill details in questionnaire, checkup list, and blood bag details
5. Capture donor status
6. Save details

Q6: How do I report adverse donor reactions?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Donor Management → Adverse Reaction Reporting Form

Q7: How do I perform blood group serology?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Blood Management → Blood Group Serology

3. Search donor by donor code or CID
4. Fill details
5. Click Save

Q8: How do I use Blood Testing Register?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Blood Management → Blood Testing Register
3. Select department
4. Fill test details
5. Save report

Q9: What happens after blood testing?

Ans:

1. If accepted, blood can be issued
2. If rejected, blood appears in discarded list

Q10: How do I perform component separation?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Blood Management → Component Separation Register
3. Select blood bag
4. Click Save
5. Blood components will be separated

Q11: When can component separation be done?

Ans:

1. It can be done before blood testing

2. It can also be done for tested or untested blood bags

Q12: What should be done with leftover or expired blood?

Ans:

1. Use Blood Discard process
2. Discard expired or unusable blood bags

Q13: How do I manage blood stock?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Blood Management → Blood Stock Register
3. Search blood bag
4. Click Fill
5. Click Save

Q14: How do I raise a blood request?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Recipient Management → Blood Request
3. Search patient by CID or UHID
4. Enter required details like blood group and components
5. Save request

Q15: Is sample dispatch mandatory after blood request?

Ans: No, sample dispatch is optional

Q16: How do I perform recipient sample testing?

Ans:

1. Click on main menu icon

2. Go to Blood Bank → Recipient Management → Recipient Sample Testing
3. Search patient
4. Click Save to complete testing

Q17: What happens after sample testing?

Ans: System allows cross match process

Q18: How do I perform cross match?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Recipient Management → Cross Match
3. Search patient
4. Save cross match details
5. Print label if needed

Q19: How do I issue blood?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Recipient Management → Blood Issue
3. Search patient
4. Complete issue process
5. Print cross match label if needed

Q20: How do I perform blood transfusion?

Ans:

1. Click on main menu icon
2. Go to Blood Bank → Recipient Management → Blood Transfusion
3. Search patient

4. Acknowledge blood bag
5. Complete transfusion process

Q21: What if a reaction occurs during transfusion?

Ans:

1. Open transfusion reaction page
2. Enter reaction details

Electronic Patient Information System (EPIS)

1. How to Access the EPIS Website?

You can access the EPIS system through the official web portal using the following URLs.

- i. Open a web browser (such as Chrome, Safari, or Edge).
In the address bar, enter any one of the following EPIS URLs:
 - a. epis.gov.bt
 - b. jdwnrh.epis.gov.bt
 - c. errh.epis.gov.bt
 - d. crrh.epis.gov.bt
- ii. Press Enter to open the EPIS login page.

2. How to Log in to EPIS?

Follow the steps below to log in to the EPIS system.

- 1.1. On the EPIS login page, enter your employee id in **username**.
- ii. Enter your **password** in the password field.
- iii. Click on the **Login** button.
- iv. After successful login, you will be redirected to your respective hospital dashboard.

👉 *Note: Please ensure that your username and password are entered correctly.*

Chapter 1: Reception Module FAQ

1.1. What is the Reception Dashboard?

The Reception Dashboard is the main interface of the Reception module. It allows users to manage patient-related activities such as registration, visit updates, referrals, and viewing patient history.

From this dashboard, users can easily access different functions required to handle patients before they proceed to other departments.

1.2. What are the Modules Available in Reception?

The Reception module consists of the following four sub-modules:

- i. **Register Patient** – Used to register new patients and record their basic details.
- ii. **Modified Visit** – Used to update or correct patient visit information.
- iii. **Referred List** – Used to view and manage patients who are referred to or from other departments or facilities.
- iv. **Patient History** – Used to view previous records, visits, and medical history of a patient.

1.3 Why Are These Modules Included Under Reception?

These modules are included under the Reception module because they are all related to **initial patient handling and information management**.

- Reception is the first point of contact for patients.
- All basic patient details and visit information are managed here.
- These functions support smooth workflow for other modules such as OPD, Billing, and Laboratory.

👉 *Keeping these features under one module helps in better organization and efficient patient management.*

Chapter 2: Register Module FAQ

From the Staff Perspective

2.1 Which fields are mandatory to be filled up?

The mandatory fields are the ones marked with **red labels**. The system will not allow you to save unless these red label boxes are filled.

2.2 How can I quickly pull up a patient's details if they only have their CID?

- i. Go to the **Document Type** dropdown menu.
- ii. Select **CID** (this is usually the default option).
- iii. Type the patient's ID number into the **CID No.** field.
- iv. Click the blue **Get** button.
- v. The system will automatically pull the patient's official information (Name, Date of Birth, Age, and Gender) from the **Census** records.
- vi. Briefly verify the displayed information with the patient to ensure it is the correct person before moving to the next step.

2.3 How do I register a patient who was sent here from another hospital or clinic?

- i. Search for the patient using their **CID** to pull their official info from **Census**.
- ii. Scroll down to the **Visit Details** section.
- iii. Click the small checkbox labelled "**Is It Referred Case?**".
- iv. Select the **Department**, **Chamber Number**, and the **Doctor** they need to see.
- v. Click the **Save** button.

2.4 What is mean by Teleconsultation

If a patient is consulted over the phone or video, you must mark it as a Teleconsultation in the system.

2.5 How do I register a patient for a 'Teleconsultation' visit?

- i. Search for the patient using their **CID** to pull their official info from **Census**.
- ii. Tick the checkbox labelled "**Is Teleconsultation**" (located next to the UHID No. field).
- iii. Ensure the patient's **Mobile No.** is correctly entered so the doctor can contact them.

- iv. Select the **Department, Chamber, and Doctor** assigned for the consultation
- v. Click the **Save** button.

2.6 How do I mark a patient who needs to see the doctor urgently?

If a patient needs to see the doctor ahead of others, you must use the **Priority** field to move them up in the queue.

- i. Go to the **Priority** dropdown menu.
- ii. Select the appropriate category (e.g., **Geriatrics, Pregnant, or Disabilities**) to give them priority in the doctor's list.
- iii. Select the **Department, Chamber, and Doctor**.
- iv. Click the **Save** button.

2.7 What should I do if I realize I entered the wrong information before saving?

If you notice a mistake while filling out the form, you can clear all the fields and start over using the Reset button.

- i. Locate the **Reset** button at the top right of the registration screen (next to the "Search Patient" button)
- ii. Click **Reset** to clear all the information you have typed in.
- iii. Re-enter the correct details, starting with the patient's **CID** to pull their official info from **Census**.
- iv. Double-check that all fields (Mobile No., Priority, etc.) are now correct.
- v. Select the **Department, Chamber, and Doctor**.
- vi. Click the **Save** button.

2.8 How do I handle a registration during 'Off-Hours' (Emergency/Night) vs 'Day-Hours'?

If you are working during a night shift or emergency hours, you must change the shift setting at the very top of the registration form.

- i. Locate the **OPD Type** section at the top of the screen.
- ii. Select **Day Hour** for normal daytime registration.

- iii. Select **Off Hour** if you are registering a patient during the night or emergency shift.
- iv. Search for the patient using their **CID** to pull their official info from **Census**.
- v. Select the **Department, Chamber, and Doctor**.
- vi. Click the **Save** button.

2.9 How do I register a mother and child for the MCH clinic?

When a mother or child comes for services like ANC, PNC, or vaccinations, you must use their MCH number and mark it as an MCH visit.

- i. Go to the **Document Type** dropdown menu and select **MCH**.
- ii. Enter the **MCH No.** (e.g., TP-THI-2024...) into the field.
- iii. Click the blue **Get** button to pull their info.
- iv. Scroll down to the **Visit Details** section and tick the checkbox labelled "**Is it an MCH Visit?**".
- v. Select the **Department, Chamber, and Doctor**.
- vi. Click the **Save** button.

From the Patient's Perspective (The "What do I do?" side)

2.10 What documents must I bring to the registration counter to get registered?

To get registered, you must provide one of the following official documents so your information can be found in the system (Census/MCH records):

- i. **Citizen Identity Card (CID)** – The most common document.
- ii. **Mother and Child Health (MCH) Card** – For mother and child visits.
- iii. **Passport** or **Work/Student Permit** – For non-citizens.
- iv. **UHID Number** – If you have been registered at this hospital before.

2.11 I have visited this hospital before; do I need to fill out all my details again?

No, you do not need to fill out all your details again. Since you have been hospital before, the system already has your records saved under your **UHID** (Unique Health ID).

- i. Provide your **UHID number** (or your **CID**) to the receptionist.
- ii. The receptionist will enter it into the **Quick Search** box.
- iii. Your details will automatically pop up, and they will simply click on your name to load your file.
- iv. They will then select the **Department**, **Chamber**, and **Doctor** for your current visit.
- v. Click the **Save** button.

2.12 How do I get my UHID (Unique Health Identification) number?

Your UHID is a permanent number created by the system the very first time you are registered at the hospital.

- i. Provide your **CID** to the receptionist so they can pull your official info from **Census**.
- ii. Once the receptionist fills in your details and clicks the **Save** button, the system automatically generates your **UHID number**.
- iii. The receptionist can then click the **Print Health Card** button to give you a card with your UHID on it.
- iv. Select the **Department**, **Chamber**, and **Doctor**.

- v. Click the **Save** button.

2.13 Can I register a family member who is too sick to come to the counter?

Yes, you can register a family member. You just need to provide their official document (CID or UHID) at the counter.

- i. Provide the patient's **CID** to the receptionist so they can pull the patient's official info from **Census**.
- ii. The receptionist must select your relationship to the patient in the **Relation** field (which is a mandatory red-label field).
- iii. Ensure the **Mobile No.** and address are correct so the medical team can contact the family.
- iv. Select the **Department, Chamber, and Doctor**.
- v. Click the **Save** button.

2.14 How do I know which department or doctor I should register for?

The choice of department or doctor is usually based on a referral letter or the patient's specific health complaint.

- i. Check the patient's **referral letter** or previous appointment record to see which department they were assigned to.
- ii. If there is no referral, the receptionist or triage staff will select the **Department** based on the patient's symptoms (e.g., Dentistry for tooth pain).
- iii. Select the **Facility Department, Chamber Number**, and the **Doctor** from the dropdown lists.
- iv. Click the **Save** button.

a. **From the Doctor/Lab Side**

2.15 How can I make sure the patient's contact details are correct for follow-up calls?

To ensure the doctor or hospital can reach the patient later, you must manually check and update their phone number during registration.

- i. Search for the patient using their **CID** to pull their official info from **Census**.
- ii. Go to the **Mobile No.** field on the registration form.
- iii. Ask the patient for their current, active phone number and type it into the box.
- iv. Double-check the numbers you typed to avoid any mistakes.
- v. Select the **Department, Chamber, and Doctor**.
- vi. Click the **Save** button.

2.16 How do I see if a patient has been marked as a 'Priority' case by the registration desk?

You can check if a patient was given priority by looking at the "Patient Visit Register" report or the "Modify Visit" screen.

- i. Go to the menu and search for **Patient Visit Register**.
- ii. Click the **Show** button to view the list of registered patients.
- iii. Look at the **Patient Category** column. If a priority was selected, it will show as **Geriatrics, Pregnant, or Disabilities** instead of "General".
- iv. If you need to change this, go to **Reception -> Modify Visit**, search for the patient, and click **Re-Register**.
- v. Select the **Department, Chamber, and Doctor**.
- vi. Click the **Save** button.

System

2.17 What is UHID No and how is it different from CID?

- i. **CID** is your national ID from the **Census** office.
- ii. **UHID** is a permanent number the **hospital** gives you after your first visit.
- iii. CID is used to find your official identity; UHID is used to find your medical history in the hospital.
- iv. Select the **Department, Chamber, and Doctor**.
- v. Click the **Save** button

2.18 What if the patient doesn't have a CID? Which 'Document Type' should I select?

- i. Click the **Document Type** dropdown menu.
- ii. Select an alternative like .
- iii. If it is a new baby, you can select **MCH**.
- iv. Select the **Department, Chamber, and Doctor**.
- v. Click the **Save** button.

2.19 How do I select Patient Category? What options are available?

- i. Click the **Patient Category** dropdown (mandatory red-label field).
- ii. Select the shift you are working in, such as **General Day Hour** or **Off Hour**.
- iii. Select the **Department, Chamber, and Doctor**.
- iv. Click the **Save** button.

2.20 How do I enter Present Address and Permanent Address?

- i. Select the **Dzongkhag** and **Gewog/Throm** for both sections.
- ii. To save time, if the addresses are the same, click the checkbox **"Is Address Same as Permanent Address?"**.
- iii. The system will automatically copy the details from one to the other.
- iv. Select the **Department, Chamber, and Doctor**.
- v. Click the **Save** button.
- vi. Click **Close** once the success message appears.

2.21 How do I find a specific Village or Zone if it's not in the dropdown list?

- i. First, ensure you have selected the correct **Dzongkhag** and **Gewog/Throm**.
- ii. Click the **Village/Zone** dropdown to see the options for that area.
- iii. If it is still missing, contact the system administrator to add the new location.
- iv. Select the **Department, Chamber, and Doctor**.
- v. Click the **Save** button.

2.22 Are 'Mobile No' and 'Emergency Contact No' both mandatory?

- i. No. Only **Mobile No** is mandatory because it has a **red label**.
- ii. **Emergency Contact No** has a black label, so it is optional, but it is good to fill it if possible.
- iii. Select the **Department, Chamber, and Doctor**.
- iv. Click the **Save** button.

2.23 When should I check the 'Is Teleconsultation' box?

- i. Use this when the patient is **not** at the hospital but is talking to the doctor via phone or video.
- ii. It tells the doctor to call the patient instead of waiting for them in the room.
- iii. Select the **Department, Chamber, and Doctor**.
- iv. Click the **Save** button.

2.24 What is the difference between 'New' and 'Follow-up' in Case Type?

- i. Select **New** if the patient is visiting for a fresh health problem.
- ii. Select **Old/Follow-up** if they are returning for a check-up on a problem they already saw the doctor for.
- iii. Select the **Department, Chamber, and Doctor**.
- iv. Click the **Save** button.

2.25 After I click 'Save,' how do I know it was successful?

- ii. A green box will appear in the top-right corner saying "**Saved Successfully.**"

- iii. A popup window will also appear showing the registration details.
- iv. You must click the **Close** button on that popup to finish

MODULE: FORENSIC

1. How do you access the Forensic module in Epis?

After logging into Epis:

- i. Go to the Dashboard
- ii. Locate the Forensic icon
- iii. Click on the Forensic icon to open the Forensic module.

This module is used to manage deceased patient registration, autopsy reports, forensic forms, and death certificates.

2. How do you register a deceased patient in the Forensic module?

To register a deceased patient:

- i. Click on MLDI Registration.
- ii. If the deceased has a CID number, enter the CID.
- iii. Click the Get button to automatically fetch the personal details.
- iv. If the deceased does not have any documents, you can enter the details manually.
- v. Enter the following information:
 - Name
 - Sex
 - Age
- vi. In the Visit Details section, select the department as Department of Forensic and Toxicology Medicine.
- vii. Select the Doctor responsible for the case.

After entering the details, click save to complete the registration.

3. How do you store the body in the mortuary system?

If the body needs to be stored in the mortuary:

- i. During registration, select the Available Rack.
- ii. Then select the Available Shelf.

This step helps record the exact location where the body is stored in the mortuary freezer.

4. How can users access forensic reports for a registered patient?

To access forensic reports:

- i. Click on the Forensic Icon

- ii. Select Dashboard.
- iii. Find the patient in the list.
- iv. Click on the three-dot icon in the Fill Report column
- v. Choose the required report option such as:
 - Autopsy
 - Forensic DSI/CSI
 - Death Certificate

This allows users to open and complete the required forensic documentation.

5. How do you enter an Autopsy report in the system?

- i. Go to the Forensic Dashboard
- ii. Click the three-dot icon next to the patient.
- iii. Select Autopsy
- iv. The Autopsy page will open.
- v. Enter the required information in:
- vi. After entering the data, choose one of the following options:

Save Draft

- Saves the information temporarily
- Allows editing later

Save Final

- Submits the report as final
- No further editing is allowed.

6. How do you fill the Unnatural Death Data Collection Form or Postmortem Report?

To fill these forms:

- i. Open the Forensic Dashboard.
- ii. Click the three-dot icon for the selected patient.
- iii. Click Forensic DSI/CSI.
- iv. Select the required form:
 - Unnatural Death Collection Form.
 - Postmortem Report Form.
- v. Enter the required details.
- vi. Click Save to store the information in the system.

8. How do you issue a Death Certificate in the system?

To issue a death certificate:

- i. Go to the Forensic Dashboard
- ii. Click the three-dot icon beside the patient
- iii. Select Death Certificate.
- iv. Enter the required details such as:
 - Cause of death
 - Date of death
 - Other necessary information
- v. Click Save

The death certificate will then be recorded in the system.

8. How do you order laboratory or radiology tests for a deceased person?

To order tests:

- i. Open the patient record in the Forensic Dashboard.
- ii. Click Order Test
- iii. In the Search Orders field, search for the required test.
- iv. Select the laboratory or radiology test.
- v. Click Save
- vi. Confirm by clicking Yes.

The test order will be sent to the LIS (Laboratory Information System) or RIS (Radiology Information System)

9. How can users view forensic and laboratory reports?

To view reports:

- i. Click on the Medical Report File icon.
- ii. Two options will appear:
 - F – View forensic data captured in the forensic dashboard.
 - I – View laboratory or imaging test reports.

This allows users to review both forensic findings and medical test results.

10. How do you access the Mortuary module in Epis?

To access the Mortuary module:

- i. Click on the Mortuary Icon in the system.
- ii. Select the Freezer where the body is stored.

This module is used to manage body storage and freezer monitoring.

11. How do you record freezer temperature in the mortuary?

To record temperature details:

- i. Click the three-dot icon next to the freezer.
- ii. Enter the following values:
 - Maximum Temperature
 - Current Temperature
 - Minimum Temperature
- iii. Click Save.

This helps maintain proper storage conditions for deceased bodies.

12. How can users view the freezer temperature chart?

To view temperature history:

- i. Click the three-dot icon next to the freezer.
- ii. Select View Temperature Chart.

The system will display a graph showing temperature variations over time.

13. How do you hand over a dead body to the relatives?

To hand over the dead body:

- i. Click the three-dot icon beside the deceased record.
- ii. Select Dead Body Handover
- iii. Enter the required details about:
 - The person receiving the body
 - Relationship to be deceased
 - Date and time of handover
- iv. Click Save

This records the official handover of the body to the relatives.

MODULE: Administration

Doctor User Creation

1. What is the Administration Module in EPIS?

The Administration Module is used to manage users and roles in the epis system.

It allows administrators to:

- Create doctor/prescriber users
- Assign roles
- Map departments
- Enable appointment availability
- Assign chambers

2. How do you create Doctor/prescriber user in EPIS?

To create a doctor user:

- i. Go to menu bar at side and search Application user
- ii. Click on create user and put all necessary details about the users and save
- iii. Click on Add doctor if the user is doctor(only)
- iv. Select the Role based on their specialty
- v. Add Doctor Department
- vi. Click save and update

The user will be successfully updated.

3. How do you assign a department to a doctor?

After creating the doctor user:

- i. Click on the Select dropdown (--select--)
- ii. Choose the Department where the doctor will work.
- iii. Click Save or Update.

This step ensures that the doctor is linked to the correct department.

4. How do you assign a chamber to a doctor?

After mapping the department:

- i. Click on Assign Chamber
- ii. Click on add new button.
- iii. Click on the facility department where the doctor is mapped.
- iv. The doctor will automatically appear in the list, and the chamber can then be assigned.
- v. Click Save to complete the process.

5. Why am I unable to assign a doctor role to a user?

The reasons are:

- i. User is not created in the system
- ii. Insufficient admin permissions
- iii. Role not selected properly
- iv. System error or network issue
