- ii. Incorrect department or location selected
- iii. Prescription not approved
- iv. System role restriction

MODULE: Grievance

1. How to Access the Grievance Module in EPIS?

The Grievance module allows users to register and manage complaints raised by staff or the public.

Steps:

- i. Login in the EPIS system.
- ii. On the homepage, click the Grievance icon or open the burger menu on the left side. iii. Click the Grievance menu.
- iv. Select the Transaction menu.

So, this will open the options related to grievance registration and management.

2. How to register a new grievance complaint?

Grievances can be registered by staff members or the public through the grievance registration form.

Steps:

- i. Navigate to Grievance – Transaction – Grievance Registration
- ii. Select the Complaint Raised By option from the dropdown list.
- iii. Choose either:
 - Staff
 - Public
- iv. Enter all the required fields in the grievance registration form.

- v. Upload supporting documents if available.
- vi. Click Save to submit the complaint.

Once saved, the system will generate a unique Complaint Number, which can be used for tracking the grievance.

The complaint number is important for future reference and tracking Only mandatory fields must be filled before saving.

3. How to Upload Supporting Documents in Grievance Registration?

Users can attach supporting documents to provide evidence related to the complaint.

Steps:

- i. Click the Choose File button
- ii. Select the required file from your computer.
- iii. Click Add to upload document
- iv. Click View Documents to verify the uploaded files.

Supporting documents may include:

- Photos
- PDF files
- Other relevant evidence.

5. How to View Registered Grievances?

All registered complaints can be viewed from the Grievance Dashboard.

Steps:

- i. Navigate to the Grievance Dashboard.
- ii. Use the filter options or click the Show button.
- iii. The system will display the list of grievances based on the selected status.

Users can track the status of grievances directly from the dashboard.
