

Chapter 1: Reception Module FAQ

1.1. What is the Reception Dashboard?

The Reception Dashboard is the main interface of the Reception module. It allows users to manage patient-related activities such as registration, visit updates, referrals, and viewing patient history.

From this dashboard, users can easily access different functions required to handle patients before they proceed to other departments.

1.2. What are the Modules Available in Reception?

The Reception module consists of the following four sub-modules:

- i. **Register Patient** – Used to register new patients and record their basic details.
- ii. **Modified Visit** – Used to update or correct patient visit information.
- iii. **Referred List** – Used to view and manage patients who are referred to or from other departments or facilities.
- iv. **Patient History** – Used to view previous records, visits, and medical history of a patient.

1.3 Why Are These Modules Included Under Reception?

These modules are included under the Reception module because they are all related to **initial patient handling and information management**.

- Reception is the first point of contact for patients.
- All basic patient details and visit information are managed here.
- These functions support smooth workflow for other modules such as OPD, Billing, and Laboratory.

👉 *Keeping these features under one module helps in better organization and efficient patient management.*

Chapter 2: Register Module FAQ

From the Staff Perspective

2.1 Which fields are mandatory to be filled up?

The mandatory fields are the ones marked with **red labels**. The system will not allow you to save unless these red label boxes are filled.

2.2 How can I quickly pull up a patient's details if they only have their CID?

- i. Go to the **Document Type** dropdown menu.
- ii. Select **CID** (this is usually the default option).
- iii. Type the patient's ID number into the **CID No.** field.
- iv. Click the blue **Get** button.
- v. The system will automatically pull the patient's official information (Name, Date of Birth, Age, and Gender) from the **Census** records.
- vi. Briefly verify the displayed information with the patient to ensure it is the correct person before moving to the next step.

2.3 How do I register a patient who was sent here from another hospital or clinic?

- i. Search for the patient using their **CID** to pull their official info from **Census**.
- ii. Scroll down to the **Visit Details** section.
- iii. Click the small checkbox labelled **"Is It Referred Case?"**.
- iv. Select the **Department**, **Chamber Number**, and the **Doctor** they need to see.
- v. Click the **Save** button.

2.4 What is mean by Teleconsultation

If a patient is consulted over the phone or video, you must mark it as a Teleconsultation in the system.

2.5 How do I register a patient for a 'Teleconsultation' visit?

- i. Search for the patient using their **CID** to pull their official info from **Census**.
- ii. Tick the checkbox labelled **"Is Teleconsultation"** (located next to the UHID No. field).
- iii. Ensure the patient's **Mobile No.** is correctly entered so the doctor can contact them.
- iv. Select the **Department**, **Chamber**, and **Doctor** assigned for the consultation
- v. Click the **Save** button.

2.6 How do I mark a patient who needs to see the doctor urgently?

If a patient needs to see the doctor ahead of others, you must use the **Priority** field to move them up in the queue.

- i. Go to the **Priority** dropdown menu.
- ii. Select the appropriate category (e.g., **Geriatrics**, **Pregnant**, or **Disabilities**) to give them priority in the doctor's list.
- iii. Select the **Department**, **Chamber**, and **Doctor**.
- iv. Click the **Save** button.

2.7 **What should I do if I realize I entered the wrong information before saving?**

If you notice a mistake while filling out the form, you can clear all the fields and start over using the Reset button.

- i. Locate the **Reset** button at the top right of the registration screen (next to the "Search Patient" button)
- ii. Click **Reset** to clear all the information you have typed in.
- iii. Re-enter the correct details, starting with the patient's **CID** to pull their official info from **Census**.
- iv. Double-check that all fields (Mobile No., Priority, etc.) are now correct.
- v. Select the **Department**, **Chamber**, and **Doctor**.
- vi. Click the **Save** button.

2.8 **How do I handle a registration during 'Off-Hours' (Emergency/Night) vs 'Day-Hours'?**

If you are working during a night shift or emergency hours, you must change the shift setting at the very top of the registration form.

- i. Locate the **OPD Type** section at the top of the screen.
- ii. Select **Day Hour** for normal daytime registration.
- iii. Select **Off Hour** if you are registering a patient during the night or emergency shift.
- iv. Search for the patient using their **CID** to pull their official info from **Census**.
- v. Select the **Department**, **Chamber**, and **Doctor**.
- vi. Click the **Save** button.

2.9 **How do I register a mother and child for the MCH clinic?**

When a mother or child comes for services like ANC, PNC, or vaccinations, you must use their MCH number and mark it as an MCH visit.

- i. Go to the **Document Type** dropdown menu and select **MCH**.
- ii. Enter the **MCH No.** (e.g., TP-THI-2024...) into the field. iii. Click the blue **Get** button to pull their info.
- iv. Scroll down to the **Visit Details** section and tick the checkbox labelled "**Is it an MCH Visit?**".
- v. Select the **Department, Chamber, and Doctor**.
- vi. Click the **Save** button.

From the Patient's Perspective (The "What do I do?" side)

2.10 What documents must I bring to the registration counter to get registered?

To get registered, you must provide one of the following official documents so your information can be found in the system (Census/MCH records): i.

- Citizen Identity Card (CID)** – The most common document.
- ii. **Mother and Child Health (MCH) Card** – For mother and child visits.
- iii. **Passport or Work/Student Permit** – For non-citizens.
- iv. **UHID Number** – If you have been registered at this hospital before.

2.11 I have visited this hospital before; do I need to fill out all my details again?

No, you do not need to fill out all your details again. Since you have been hospital before, the system already has your records saved under your **UHID** (Unique Health ID).

- i. Provide your **UHID number** (or your **CID**) to the receptionist.
- ii. The receptionist will enter it into the **Quick Search** box.
- iii. Your details will automatically pop up, and they will simply click on your name to load your file.
- iv. They will then select the **Department, Chamber, and Doctor** for your current visit.
- v. Click the **Save** button.

2.12 How do I get my UHID (Unique Health Identification) number?

Your UHID is a permanent number created by the system the very first time you are registered at the hospital.

- i. Provide your **CID** to the receptionist so they can pull your official info from **Census**.
- ii. Once the receptionist fills in your details and clicks the **Save** button, the system automatically generates your **UHID number**.
- iii. The receptionist can then click the **Print Health Card** button to give you a card with your UHID on it.
- iv. Select the **Department, Chamber, and Doctor**.
- v. Click the **Save** button.

2.13 Can I register a family member who is too sick to come to the counter?

Yes, you can register a family member. You just need to provide their official document (CID or UHID) at the counter.

- i. Provide the patient's **CID** to the receptionist so they can pull the patient's official info from **Census**.
- ii. The receptionist must select your relationship to the patient in the **Relation** field (which is a mandatory red-label field).
- iii. Ensure the **Mobile No.** and address are correct so the medical team can contact the family.
- iv. Select the **Department, Chamber, and Doctor**.
- v. Click the **Save** button.

2.14 How do I know which department or doctor I should register for?

The choice of department or doctor is usually based on a referral letter or the patient's specific health complaint.

- i. Check the patient's **referral letter** or previous appointment record to see which department they were assigned to.
- ii. If there is no referral, the receptionist or triage staff will select the **Department** based on the patient's symptoms (e.g., Dentistry for tooth pain).
- iii. Select the **Facility Department, Chamber Number, and the Doctor** from the dropdown lists.
- iv. Click the **Save** button.
